A technician wearing a blue uniform with reflective silver stripes and a yellow hard hat is seen from behind, working on a grey electrical cabinet. The technician's right hand is raised towards the top of the cabinet. The cabinet has several circular components and a red handle with a yellow warning symbol. The background is a dark grey panel with a yellow horizontal bar at the top left.

WELCOME TO UPS HIRE

We are able to provide you with short or long term UPS hire to suit the needs of your business. We have a wide range of free standing and containerised UPS' available and will work closely with you to understand your business needs, to ensure we provide an appropriate hire solution so that your critical systems are protected.

Levant currently have hired UPS systems installed across a variety of sectors such as; banking, healthcare and data management. Our UPS hire options are tailored to the needs of your business and we can have hire UPS systems installed on site in minimum time. We hold in stock a wide range of UPS hire systems from a variety of high end UPS manufacturers. The systems we have available for UPS hire are fully serviced and periodically tested to ensure they are ready to run at short notice. UPS hire is a growing market as it affords businesses the option of covering peak times during business such as public holidays or large sporting events without the huge financial commitment of purchasing a brand new UPS system. This gives sites a greater deal of flexibility allowing for adaptable power protection in line with the demands of your business.

We will maintain the system and provide a 24-hour call out response for the entire duration of the UPS hire. Get in touch with us to find out about the range of leading-brand, high quality units that we offer for immediate UPS hire.

UPS Hire

When Would Hire Suit Our Business?

There are many scenarios where you may need to hire UPS systems. For example where existing units have failed catastrophically and immediate purchase of a new system is not an option. Or perhaps you want to run generator tests whilst keeping additional systems which have no UPS support running. Many of our customers hire from us as they work towards increasing their business capacity and operations on site. Whether you need a unit in time of an onsite emergency, as part of a scheduled building maintenance programme or to provide power protection during a function or event, we are here to help and support you with the right solution.

Levant also offers a unique advantage - containerised UPS systems. This self-contained solution provides rapid deployment and is ideal for businesses upgrading or expanding so you can easily scale your power protection as your needs grow. It also provides a solution for temporary power requirements which are perfect for short-term projects or situations with limited space.

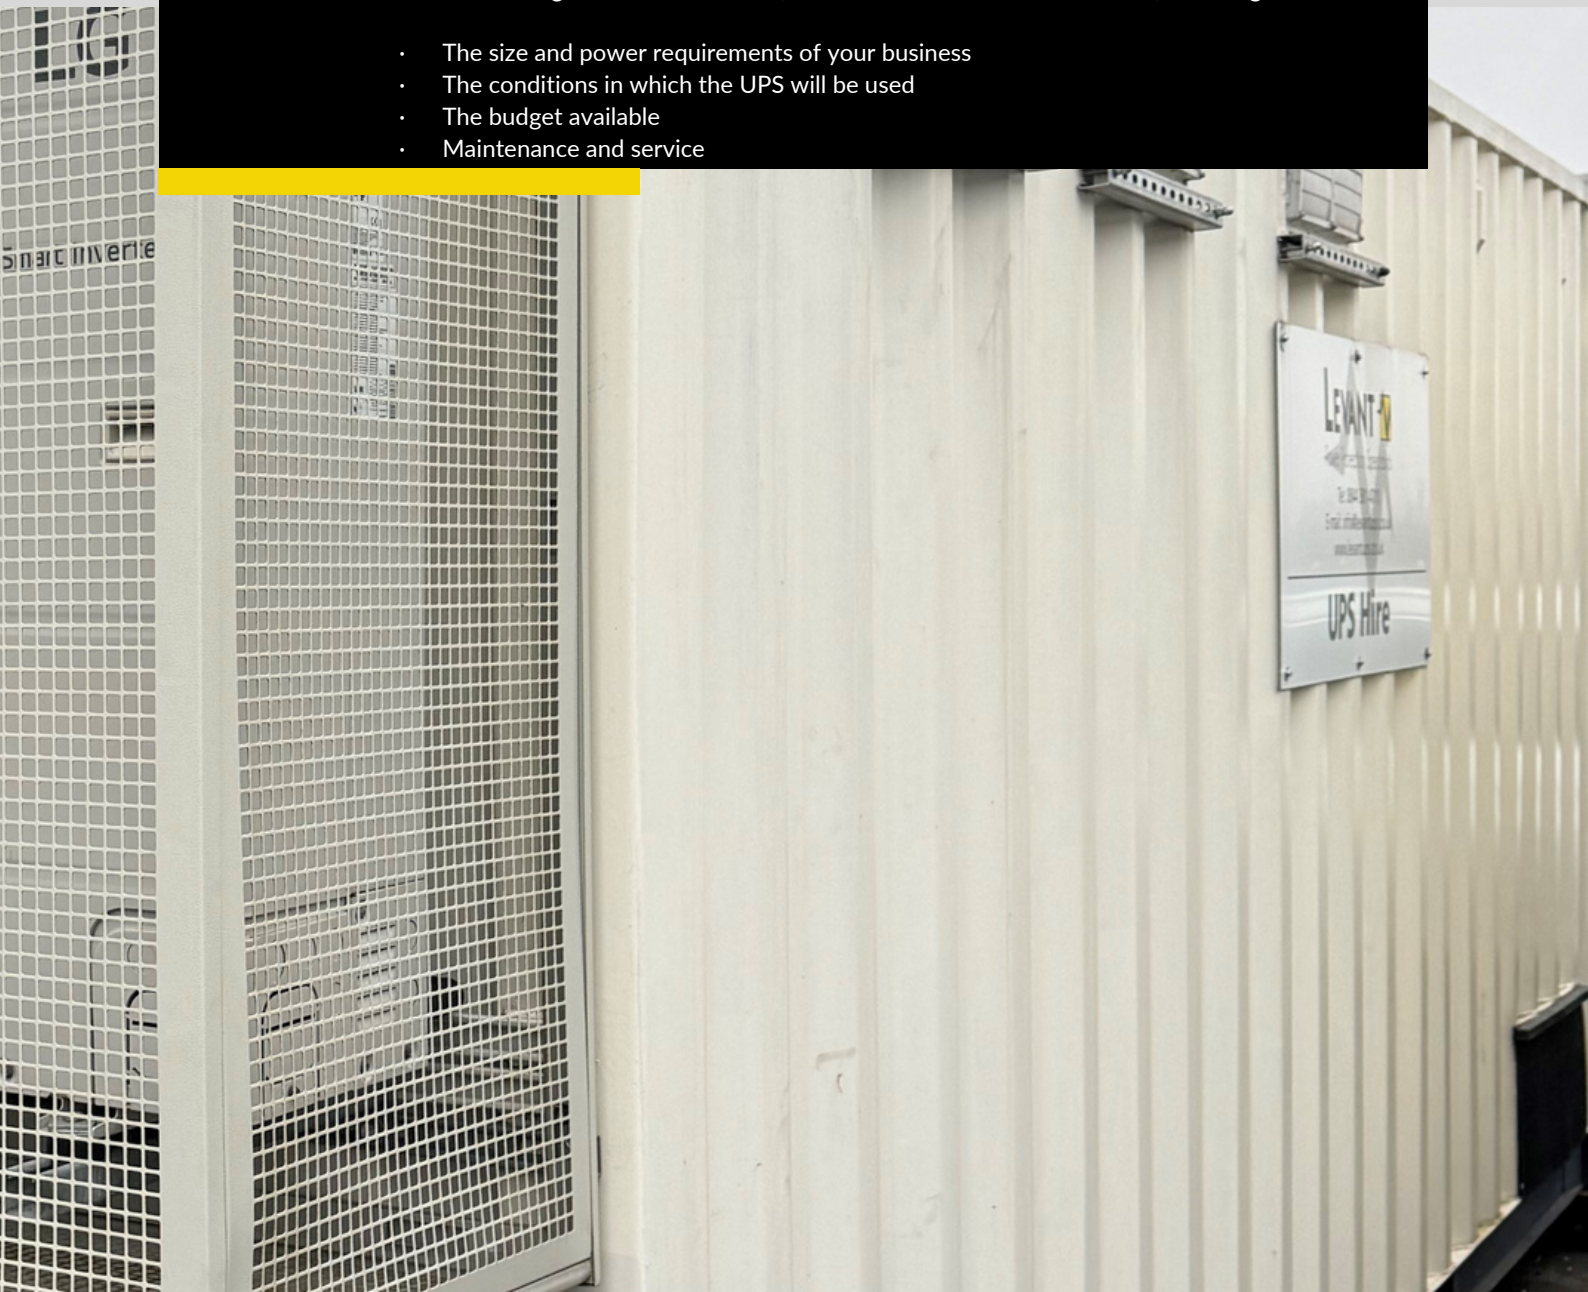

What Options Are Available?

Our UPS hire options are tailored to the needs of your business and we can have hire UPS systems installed on site in minimum time. We hold in stock a wide range of UPS hire systems from a variety of high end UPS manufacturers. Freestanding UPS' are available from 2kVA to 500kVA and containerised from 100kVA up to 1MVA in varying configurations from unitary to parallel systems. The systems we have available for UPS hire are fully serviced and periodically tested to ensure they are ready to run at short notice.

When choosing the right containerised UPS for your business, it is important to consider a few factors. Containerised UPSs do require regular maintenance and service to ensure that they operate properly, and we can support you by providing you with a suitable maintenance package.

When choosing a containerised UPS, there are a few factors to consider, including:

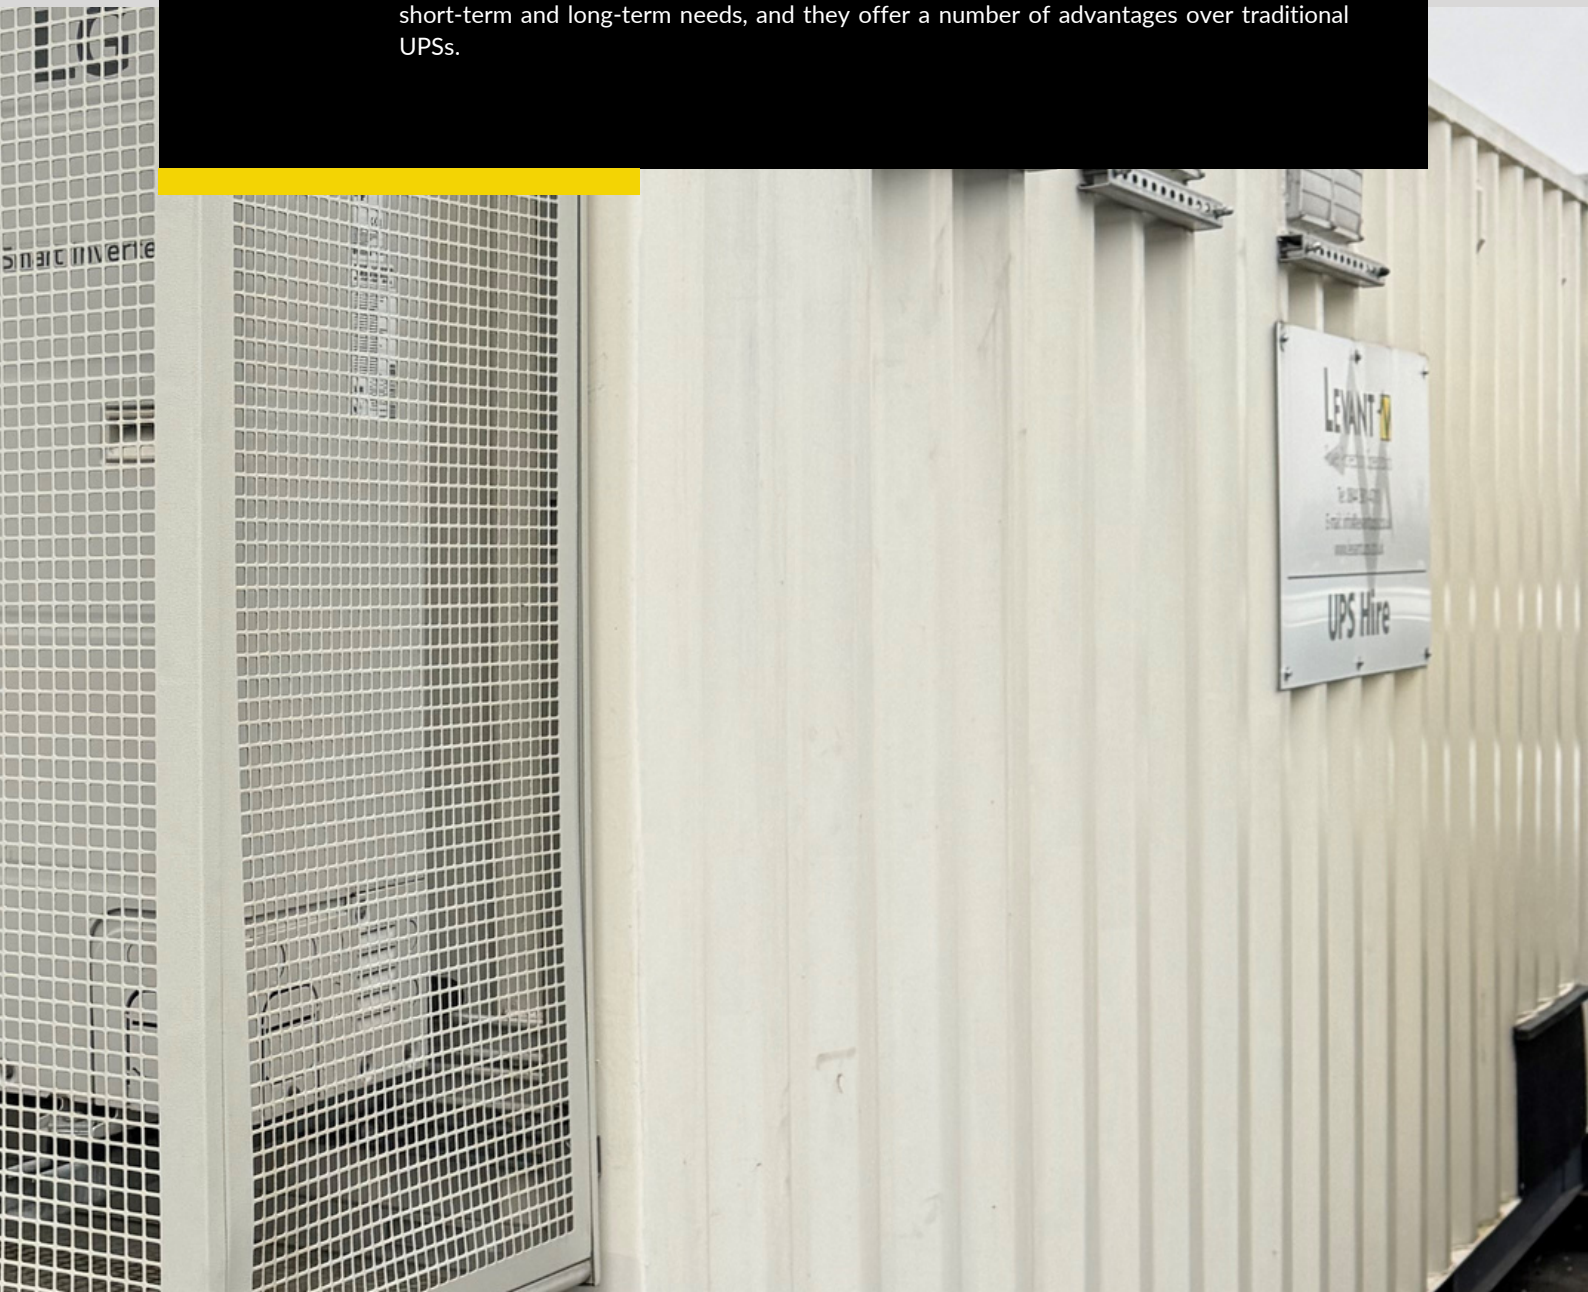

- The size and power requirements of your business
- The conditions in which the UPS will be used
- The budget available
- Maintenance and service

Introducing Containerised UPS'

A containerised UPS is a type of UPS that is housed in a self-contained container and as a result, are much easier to transport and install, whilst providing the same degree of security and protection that a traditional UPS provides. Here at Levant UPS Ltd, we have several containerised UPS's available to hire to meet the needs of your business. They are typically available in two sizes - either 10ft or 20ft containers, which keeps them fairly compact and tidy on your site. Everything needed to keep the UPSs running is also contained within the container, such as the batteries and other remedial parts. In addition, we have fitted these with Mitsubishi air conditioning units to ensure that the temperature remains optimal for the UPSs to run smoothly.

Overall, containerised UPSs offer several advantages over non-containerised UPSs. If you are looking for a UPS that is portable, secure, scalable, and easy to install, then a containerised UPS is a good option for you. They can be a good option for businesses that need a reliable, secure, and scalable power solution. Since they can be used for both short-term and long-term needs, and they offer a number of advantages over traditional UPSs.

160/200 KVA

This uninterruptible power supply system provides N+1 redundancy, ensuring consistent power even if a module fails. With a capacity of 160/200 kVA, it safeguards your equipment from power surges, blackouts, and voltage dips. It prioritises energy efficiency with high conversion rates to minimise operational costs.

QTY X 2

BATTERY RUN TIME = 10 MINS AT 100% LOAD

10FT CONTAINER

160 KVA

This modular system 160 kVA is a scalable and versatile power solution designed for demanding applications. Its modular design allows for easy expansion as your power needs grow, adding modules to increase capacity up to 160 kVA.

QTY X 2

BATTERY RUN TIME = 5 MINS AT 100% LOAD

10FT CONTAINER

100 KVA

This 100 kVA uninterruptible power supply system offers a N+1 redundancy to ensure continuous operation even if one unit fails. This system can be upgraded to 200 kVA total load with no redundancy.

QTY X 2

BATTERY RUN TIME = 10 MINS AT 100% LOAD

10FT CONTAINER

250/300 KVA

This is a heavyweight contender in the large UPS arena. It boasts N+1 redundancy, meaning your operation keeps going even if a power module fails. Alternatively, it can be 600 kVA with no redundancy.

QTY X 2

BATTERY RUN TIME = 5 MINS AT 100% LOAD (300kVA N+1)

20FT CONTAINER

500 KVA

This 500 kVA UPS boasts N+1 redundancy with our second 500 kVA container, meaning your operation keeps going even if a power module fails. Alternatively, it can be paralleled with the 500 kVA container with no redundancy at 1 mVA.

QTY X 1

BATTERY RUN TIME = 5 MINS AT 100% LOAD

20FT CONTAINER

500 KVA

This 500 kVA UPS boasts N+1 redundancy with our second 500 kVA container, meaning your operation keeps going even if a power module fails. Alternatively, it can be paralleled with the 500 kVA container with no redundancy at 1 mVA.

QTY X 1

BATTERY RUN TIME = 5 MINS AT 100% LOAD

20FT CONTAINER

800 KVA

This is our largest single containerised Uninterruptible Power Supply system designed for large-scale data centres and critical infrastructure. Our 800 kVA container delivers exceptional power protection.

QTY X 1

BATTERY RUN TIME = 3 MINS AT 100% LOAD

20FT CONTAINER

FREESTANDING **UPS HIRE**

We hold a vast stock of freestanding UPS', ready to be deployed following a site survey. Our range of UPS hire systems include a wide variety of high end UPS manufacturers. In terms of capacity, freestanding UPS' are available from 2kVA to 500kVA.

Our free-standing UPS units are primarily used indoors and are favoured for permanent installations, be it in offices, hospitals, or data centres. Their sleek design ensures they don't occupy excessive floor space, and they can seamlessly integrate into existing infrastructures. With a range of brands and kVA options available, businesses can choose a unit that matches their power consumption needs precisely.

One of the significant advantages of today's UPS market is the availability of bespoke solutions. Recognising that every business has unique demands, providers now offer customised setups. This ensures that, whether a company requires multiple low kVA units distributed across a site or a singular high kVA unit for concentrated power needs, they can get a solution tailored to their specifications.

From mobile units to sleek, efficient free-standing systems, the choices are endless here at Levant UPS Ltd. By offering customisation, you can be sure that your business not only has continuous power but also a solution that integrates seamlessly, enhancing operational efficiency.
